

# Sagebrush Quilt Guild

next meeting:  
September 26

**President:** September is really flying by this year! The leaves are changing, there is fog in the mornings and I saw my breath while running on Sunday morning! I would say Quilting weather is upon us once again. We had a very long first meeting of the year - my apologies for that. Your executive for this year introduced many exciting new programs, tweaks to the way we do "things" and outright changes - the biggest being..... WE ARE HAVING A QUILT SHOW! No need to panic just yet, we are planning for Spring 2018. Most committees already have chairs (another reason not to stress!) and initial planning is under way. Julie is leading the way and will guide us through the process. This show will be more intimate, have a smaller sales table, and include a door prize quilt. We plan to utilize a few program nights, and have select and specific requests for members to help in smaller ways along the way, if they choose too. We ask you to do what you can, when you can and only when it fits into your life. We also have another mystery quilt challenge, a President's monthly 9 by 9 block challenge, lots of new and exciting program ideas, an MS quilt group, a "Gypsy Quilt" class, 3 QTYW dates, a program idea called "Quick, Quicker, Quickest" (which intrigues me) and tons of other events and activities on the go. We invite you to participate in those activities that suit your quilting life and your quilting style. Do you have ideas for a program night? a demonstration you would like to see? a course you would like offered? Please talk to your committee chairs. We are all about participation, and making this guild better and more fun for everyone! Thanks for being part of the Guild this year. Lorraine

## Community Projects:

Next meeting is Oct. 12

Two of us had a nice QUIET time at our sewing day, too quiet, as I'm sure we were repeating ourselves by the end of the day. Would appreciate some company, we need new job material, etc.! Kits and help always available. Lots of potential in the bins as I have culled and checked them out. Jeri
